Nuclear Weapons Convention

Simulated negotiations during NPT PrepCom 2009
May 2009, New York
Second Resolution to the NWC Conference
as adopted in 2009 simulation

On the Ratification and Implementation of the Biological and Chemical
Weapons Convention by all Member

The Nuclear Weapons Convention can only be ratified, when all member states have
ratified the biological and chemical weapons convention and have taken substantial
steps for the disarmament of biological and chemical agents are undertaken and
internationally verified.

This should not prevent this Conference to negotiate the article 4, phases for
implementation, on today’s agenda. For that reason these issues will be negotiated in
the later negotiations of XIV. B, Measures to Redress a Situation and to Ensure
Compliance, Including Sanction or Article XIX. B, Ratification.
